Summary

As a self-taught web developer with a passion for learning, I specialize in JavaScript and have experience with libraries such as Node.js and React.js, as well as the framework Next.js. I have also worked with SQL databases, including MongoDB, and have recently been learning Figma for UI design. Although I have not had any formal job experience yet, I am eager to apply my skills and knowledge to a startup, either remote or on-site. Let's connect and explore opportunities!

Experience

🤝 Web Developer

Self Employed

Nov 2021 - Present (1 year 8 months)
- Built personal website and multiple full-stack projects showcasing web development skills and expertise.
- Conceptualized and implemented web solutions, including creating a personal website and developing full-stack projects.
- Contributed to open-source projects, actively engaging with the development community, and expanding technical knowledge.

Education

🔵 Rajiv Gandhi Institute of Medical Sciences

Bachelor of Medicine and Surgery, Medicine

2018 - 2018
I made the difficult decision to discontinue my studies during my first semester due to various personal and academic factors that I had to confront, and although it was a challenging choice, I am now committed to using this experience as an opportunity for personal growth and charting a new path forward in pursuit of my educational and professional aspirations.

Skills

Next.js • React.js • HTML5 • Cascading Style Sheets (CSS) • Node.js • Express.js • SQL • MongoDB • Git • TypeScript
